

Andersen EOGas Sterilizers combine the proven reliability of ethylene oxide with a unique delivery system that uses less than 11cc of gas per cycle - almost 90% less gas than our closest competition. EOGas is the most delicate sterilization system on the market and will not damage delicate items such as electronics, fiber-optics, endoscopes, cameras, or laptop computers. Ideal for long lumens, heat sensitive materials, and plastics. Bag and cartridge size can be customized to your product. Fully validatable - for medical device manufacturing.

Unique sterilization system uses unit dose cartridges and plastic sterilization bags, *no external EO tanks.*

Batch processing for small production lots in the manufacture of medical devices.

EOGas - The Future of Ethylene Oxide Sterilization
